These solid steel Acme Safes come with the choice of slot, rotary hopper or front hopper drops. All models are made to "B" rate specifications and are designed to be bolted to a concrete floor. These designs allow quick deposits without actual access inside the safe, and some models offer additional room for cash drawer storage. Although instant protection is gained from holdups or burglary, these safes are not meant for the unprotected overnight storage of cash.

### Standard features include:

- + "B" rate construction with solid steel doors & bodies
- + U.L. Group II combination lock, U.L. dual key lock or U.L. electronic lock
- + Solid steel dead bar prevents door removal during a burglary attack
- + Reinforced door frames for added strength
- + Auxiliary spring loaded re-locking devices
- + Slot and hoppers protected by "Anti-Fish" baffles
- + Bottoms pre-drilled with four holes for bolting
- + One year warranty
