

## Hotel/Dorm/Patient Room Safes

The Acme Hotel/Dorm/Patient Room Safe is used for the safekeeping of a guest's valuables. It's ease of use and affordability make it the right choice for hotel, motels, dormitories and hospitals. The guest pushes the memory button (on digital models only) and then enters a personal code up to 17 digits. The sequence is finished when the pound (#) sign is pushed. Close the door, enter the code, and turn the handle and the safe is locked. Enter the same code to open the safe.

### Standard features include:

- Easy to use and maintenance free
- Personal codes are entered quickly
- Changeable Master Code provides emergency override procedures to management
- Uses 4 AA batteries located on the outer door, behind a hidden compartment
- Mounting to a shelf, cabinet, wall or floor
- Hidden internal hinges
- Wrong try penalty

Other sizes available upon request

### Optional model features:

- New Fingerprint Access available
- Optional 3,4,5,6 digits setting
- Code appearance on screen or not
- Mechanical override key
- Time delay before opening (optional 0-24 minutes setting)
- Low battery announcement & Low energy consumption
- Specially designed space for lap-top computer
- Single-time molded case and unique spray coating technique
